

Install Telegram Bot Python Library in Spyder

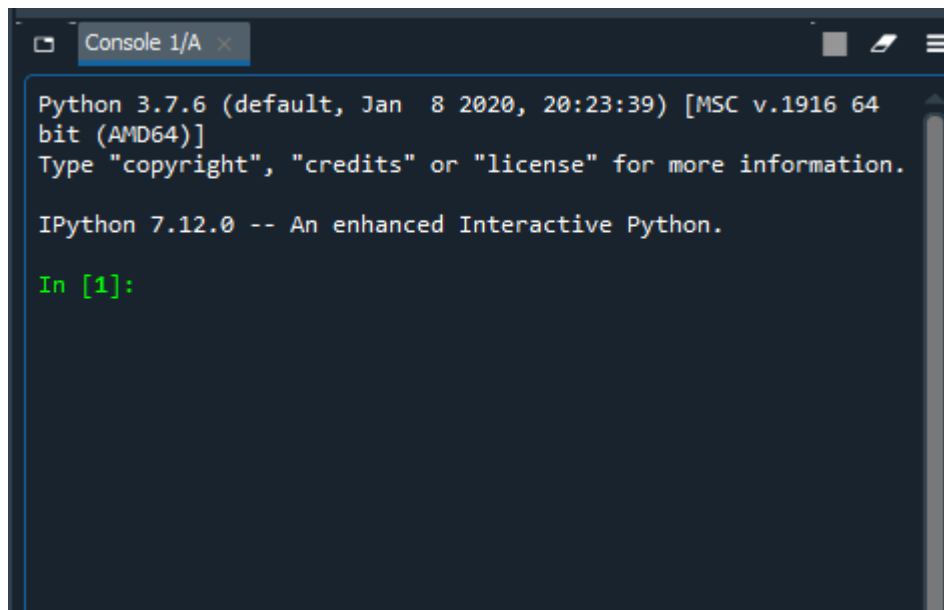

1. Launch Anaconda Navigator that we have installed previously

2. Click "Launch" Spyder

3. If you can see a console like below, go to step 5. If not, go to step 4.

```
Python 3.7.6 (default, Jan 8 2020, 20:23:39) [MSC v.1916 64 bit (AMD64)]
Type "copyright", "credits" or "license" for more information.

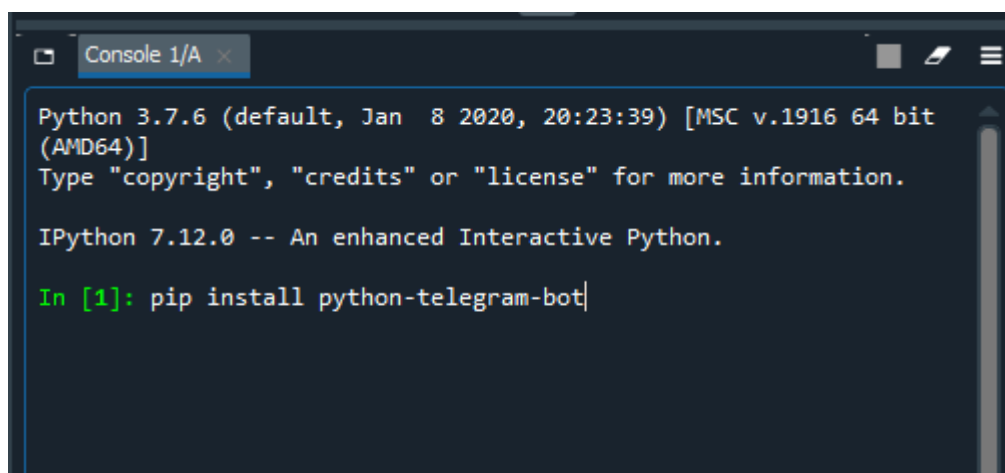

IPython 7.12.0 -- An enhanced Interactive Python.

In [1]:
```

4. If you do not see the console, click on “Consoles” >> “New Console”.

5. Enter “pip install python-telegram-bot” in the console, then press enter

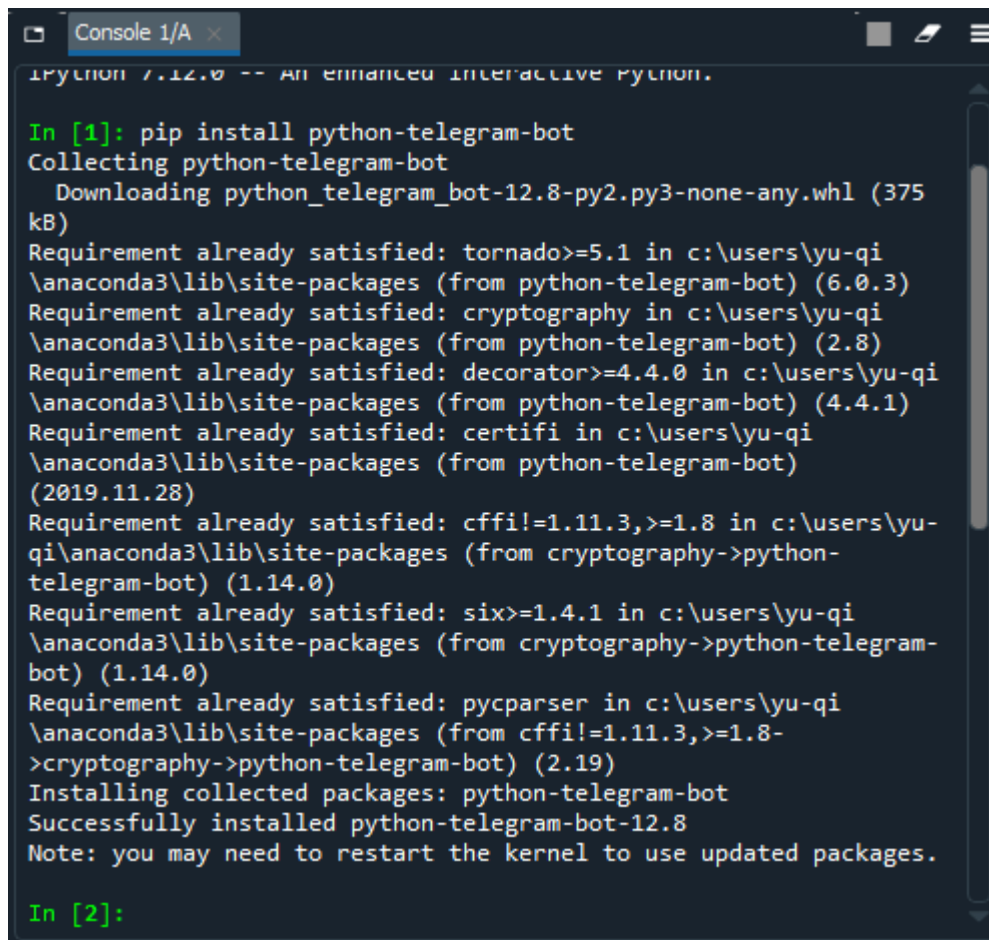

```
Python 3.7.6 (default, Jan 8 2020, 20:23:39) [MSC v.1916 64 bit (AMD64)]
Type "copyright", "credits" or "license" for more information.

IPython 7.12.0 -- An enhanced Interactive Python.

In [1]: pip install python-telegram-bot
```

You should see below

```
Python 7.12.0 -- An enhanced interactive Python.  
  
In [1]: pip install python-telegram-bot

Note: you may need to restart the kernel to use updated packages.  
  
In [2]:
```

6. Close Spyder and launch it again.
7. Open the python file shared. Click “File” >> “Open” >> browse and open the file you want to open, for example, “main_bot.py”. Note the file should have extension “.py”.
