

What does your bot do?

This bot helps users look up Pokémon statistics.

Feature 1

When the user says:

pikachu

The bot should:

Look up information about the Pokémon named "pikachu".

Use this API endpoint:

https://pokeapi.co/api/v2/pokemon/{pokemon_name}

Show the user:

- Pokémon name
- Type(s)
- Height
- Abilities

===

Create a Telegram bot based on the requirements above. Use the API endpoints provided for each feature and generate all code needed to run the bot.
